

## Spec Products Attain “level”® Certification

“level”® provides customers with an open and transparent means of evaluating the environmental and social impacts of furniture products for the built environment. Level is a multi-attribute, sustainability standard that takes into account a company’s social actions, energy usage, material selection and human and ecosystem health impacts. It addresses how a product is sustainable from multiple perspectives. Level is expected to be the eco-label to look for when specifying environmental responsible contract furniture.

The following Spec products are “level® 1 certified:
