Durability that Can't Be Beat

Made from rotationally molded polyethylene, Hardi is virtually indestructible. The one-piece chair is a breeze to clean and extremely robust. Available in Lounge and Dining designs, the Hardi Series gives specifiers the ability to bring Spec into more Behavioral Health applications.

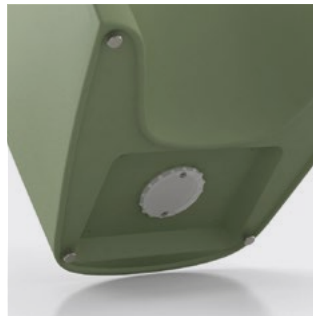

Hardi Features

Hardi sits close to the ground. Nylon glides are available as an option to prevent marring.

Hand grips make it easy to move the chair while seated.

Up to 132 lbs of weight can be added through the 3" opening. The threaded cap is then secured with tamper-proof hardware.

The optional ganging plate allows users to connect chairs together.
